

Pre-filter

Low cost Light weight Compact structure

// The user can customize according to the actual working conditions //

- Central air conditioning and centralized ventilation system filtration
- Large air compressor filter
- Clean return air system
- As the primary filter of the high efficiency filter unit

Product Description Construction Advantage specification Application Product Display Customer Cases

Product Description

Pre filters are responsible for filtering out the particulate in air before it gets to the HEPA or ULPA filters. Generally, these remove larger particles. Using pre-filter is also a great way to extend the life of your HEPA filters, as it makes the HEPA filter work less.
